## Moroccan Gazafric finds new ways to improve

Ten years ago, the world's largest LPG filling plant was built in the Moroccan desert to keep up with an increasing demand of 6% per year. The result was a unique filling facility with a total of 10 carrousel filling all types of cylinders in the Moroccan market: a whopping 25 million cylinders in 2016 - amounting to 216,000 tons of gas. But Gazafric is not one to rest on its laurels. On the contrary, the Moroccan player has cemented his position in the African filling industry as the market leader and keeps improving his business. Most recently, the customer was three times ISO certified to stand out from the competition as a supplier on top of his game.

## The benefits of LPG in the developing world

Three billion people worldwide breathe in deadly air due to the burning of solid fuels, coal and biomass used for cooking on primitive stoves or open fire. But switching to LPG has a dramatic impact on indoor air quality saving the lives of millions in developing countries. It also helps to keep children in school freeing them from collecting solid fuels, it creates more jobs, stops deforestation and saves the environment. A devastating 1 out of 8 deaths across the globe is caused by air pollution i.e. making it the single greatest health risk to man. Respiratory illness from cooking on primitive stoves will be causing

## The 30th World LPG Forum

Meet Kosan Crisplant and MAKEEN Energy at the venue.

**Booths 61-62-63**

This year marks the 30th World LPG Forum and we wouldn't miss it for the world.

From **3-5 October 2017**, you can find Kosan Crisplant and MAKEEN Energy at the Palais des Congrès, Marrakech, Morocco in **booths 61-62-63**.

Please stop by!

**4,000 premature deaths each day** by 2030 if nothing is done to address the problem.

Examine our infographic on LPG in developing countries to get your facts straight about the damages of indoor air pollution and how LPG can be a means to decrease these alarming figures. The information contained in the infographic was originally posted on the WLPGA website.
