

Kosan Crisplant's manual leak detectors are designed for manual leak detection on valve seats of LPG cylinder valves.

- Leak detection on the basis of visual inspection
- Ideal solution for low capacity filling plants
- Suitable after random filling of different cylinder types
- Easy installation in existing plants
- Small investment

The TSV leak detector can detect leaks from the valve seat, pos. A (with closed valve)

Manually operated TSV leak detector

Your benefits

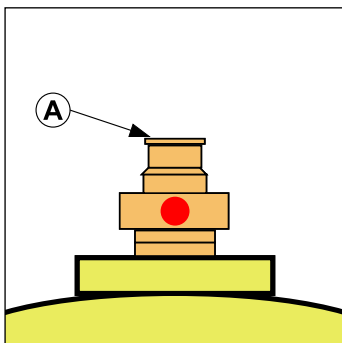

- Easy to use
- Hand-held and mobile units
- Minimum maintenance
- Minimum space requirements
- Flexible to all cylinder diameters and heights

Your possibilities

- Manual leak detectors for centre valves or screw valves
- Practical gallows suspension can be supplied
- Can be used as stand-alone unit or together with conveyor
- Automatics for control of cylinder flow at in-line chain conveyor

Your safety

- All manual leak detectors are designed for use in hazardous areas classified as Zone 1 according to IEC 79-10 and Class I, Division 1 according to NEC (USA), article 500
- National/local approvals

The TCV leak detector can detect leaks from the valve seat, pos. A

Manually operated TCV leak detector
